GUITARS

ASAT CLASSIC

5 856 zł

PICKUPS: 2 traditional size G&L Magnetic Field Design single coil pickups
BODY: Alder on Standard and all solid finishes, Swamp Ash on all Premier finishes
NECK: #2 Hard Rock Maple neck with rosewood or maple fingerboard
TUNERS: Non-locking tuners
BRIDGE: Traditional "boxed" steel bridge with six saddles
CONTROLS: 3-way pickup selector, volume, tone
FINISH: Standard finishes included
OTHER: Chrome hardware, 3-ply white pickguard

ASAT CLASSIC SEMI-HOLLOW

7 027 zł

Same as ASAT Classic, except features twin "Voice Chambers" on the left and right sides of the body. "Voice Chambers" are tuned to complement each other for maximum acoustic qualities. Available with or without "f" hole. Standard and Premier finishes included, with Swamp Ash body. Choice of Pearl, Tortoise Shell, Creme, Mirror, 3-ply black, 1-ply black or 3-ply white pickguards.

ASAT CLASSIC CUSTOM

6 051 zł

Same as ASAT Classic, except features a customized ASAT Special neck pickup employing longer pole piece bushings, deeper bobbin and increased number of winds. The result is a warmer, fatter sounding version of the ASAT Special pickup, which pairs very well with the ASAT Classic bridge pickup for fabulous single-coil jazz and blues tones.

ASAT CLASSIC CUSTOM SEMI-HOLLOW

7 222 zł

Same as ASAT Classic Custom, except features twin "Voice Chambers" on the left and right sides of the body. "Voice Chambers" are tuned to complement each other for maximum acoustic qualities. Available with or without "f" hole. Standard and Premier finishes included. Swamp Ash body. Choice of Pearl, Tortoise Shell, Creme, Mirror, 3-ply black, 1-ply black or 3-ply white pickguards.

ASAT CLASSIC BLUESBOY™

6 441 zł

Same as ASAT Classic, except features G&L Nickel Covered Alnico V Humbucker in the neck position.

ASAT CLASSIC BLUESBOY™ SEMI-HOLLOW

7 612 zł

Same as ASAT Classic Bluesboy™, except features twin "Voice Chambers" on the left and right sides of the body. "Voice Chambers" are tuned to complement each other for maximum acoustic qualities. Available with or without "f" hole. Standard and Premier finishes included. Swamp Ash body. Choice of Pearl, Tortoise Shell, Creme, Mirror, 3-ply black, 1-ply black or 3-ply white pickguards.

ASAT DELUXE

8 979 zł

PICKUPS: G&L AS4250B Alnico humbucker in neck position;
G&L AW4370B Alnico humbucker in bridge position
BODY: Wood Bound Premium Flamed Maple Top on Mahogany body
NECK: #1 Hard Rock Maple neck with Rosewood or Maple fingerboard
TUNERS: Non-locking tuners
BRIDGE: G&L patented "Saddle Lock" fixed bridge
CONTROLS: 3-way pickup selector, mini-toggle splits both pickups, volume, tone
FINISH: Premier finishes included
OTHER: rear-mounted controls, chrome hardware, Deluxe Tolex case

Exclusive G&L Features

MAGNETIC FIELD DESIGN™ PICKUPS - for guitars and basses were designed and patented by Leo Fender at G&L. These pickups have a higher output with less noise than traditional Alnico magnet pickups. The tone of "MFD" single coil pickups is warmer and slightly darker than standard Alnico magnet single coils. Each pole piece is adjustable for perfect volume balance between strings.

DUAL FULCRUM Vibrato System - One of Leo Fender's first design patents at G&L. The Dual Fulcrum system is a simple, elegant design with silky smooth "feel" bending both up and down. The tuning stability is exceptional and string breakage is kept to a minimum due to the innovative shape of the bridge saddles.

SADDLE LOCK™ Non-Vibrato bridge - Patented by Leo Fender and G&L, a set screw at the side of the bridge compresses the saddles together. The saddles now resonate in unison with the bridge plate, resulting in more focused attack and improved sustain. A foot on the underside of the bridge fits into a rout in the body, pressing against the endgrain of the body wood for maximum sustain.

P.T.B.™ Passive Treble and Bass tone controls for guitars - These controls are dramatically more effective than standard "volume/tone/tone" setups. Treble and bass frequencies can be cut separately, and are effective on all pickups unlike traditional arrangements.

TRI-TONE™ Active Bass Circuitry - Treble and bass can be cut or boosted, a Series/Parallel switch determines signal route through the humbuckers, and a 3-position mini-toggle for preamp off/on/on with High EQ boost. Incredible sonic versatility for any playing style from slap/funk, smooth jazz to power packed rock.

ULTRA-LITE™ Bass Tuning Machines - An aluminum string post reduces weight which improves the balance of the instrument.

G&L -

A Celebration

of American

Craftsmanship.

Fine musicians who have played every kind of guitar over the years are feeling again long-forgotten excitement and thrills as they play G&L instruments.

In this cynical era, the little G&L factory in Fullerton, California - the town where these kinds of instruments were born - seems like a throw-back to a simpler and romantic age. These Californians with love, dedication and great skill slowly and painstakingly give shape, form and voice to the G&L instruments.

There are no computer driven robots popping out guitars with uniform precision but no soul. At G&L, people make instruments, and many of these people are skilled musicians themselves. Each craftsman imparts some of his or her own personality and soul into each instrument. Guitars made this way have a life - a vitality - that responds to the player like no other.

Instruments from G&L, the company founded by Leo Fender, epitomize authenticity and integrity of design, engineering and craftsmanship.

“In the distinguished tradition of its founder, G&L has perpetuated the art of fine instrument making”

Kebin Ahrens

The Music Paper
